

How It Works

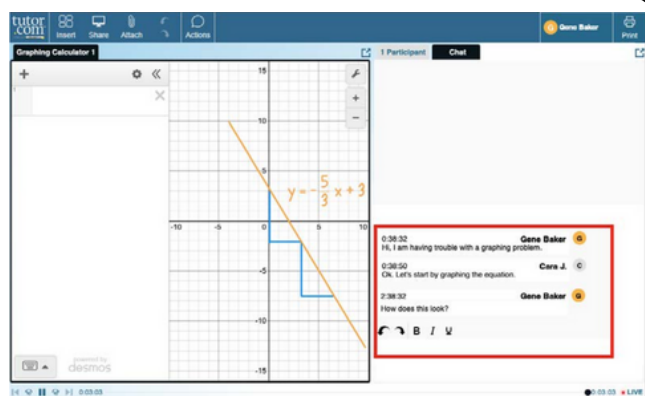

Connect with a Tutor Now

Fill out the pre-session questionnaire and you will be matched with the first available tutor. You can choose to communicate with your tutor by text chat or by text chat together with voice. Use the Question box to tell your tutor what you need help with and attach a file if needed.

Interactive Whiteboard

In addition to the text chat and text chat with voice functions, Tutor.com features an interactive whiteboard that allows you to share work and ideas with your tutor. It includes tools such as a graphing calculator, code editor, and text editor which can all be opened using the buttons above the whiteboard. The option to attach documents is also available within the session.

Schedule a Session

Use the Schedule a Session option if you'd like to schedule a future session. Click Schedule next to your preferred tutor's name to see their availability. If it says View Profile, it means that tutor is not available for scheduled tutoring, only the on-demand option.

My Account Features

Locker- Access files you have saved or those you have shared in sessions with your tutors.

Favorite Tutors- Reconnect with your favorite tutors or see when they are next available.

Completed Sessions- See transcripts from previous sessions and replay past sessions to further review material.
