

## **077200 ROOF SPECIALTIES AND ACCESSORIES**

1. Provide access to the roof from interior of building. Interior roof hatches shall be located in areas restricted to the general public and accessible only by authorized personnel. Interior roof hatches shall be specified with integral roof hatch safety rails, and a powered open-close mechanism. Solar operated units are not permitted. Hatch location shall also include a wall mounted open-close controller.
2. Roof access by stairs is preferable to vertical ladders.
