

087113 AUTOMATIC DOOR OPERATORS

1. Provide ADA wall push plates.
 - a. Preferred Manufacturer: Stanley
2. Do not specify pad-mounted openers of any kind.
3. Provide at least one door (interior and exterior at vestibules) at the main entrance of each building with automatic door operators. Vestibule doors shall operate independently of each other to avoid a situation where an individual cannot negotiate both doors without becoming trapped in the vestibule. Doors shall operate via push plates or motion sensors. Where a building has more than one main entrance an automatic door shall be provided at each entrance to the facility. Where card readers are being used for entry doors, and where there are multiple doors at a main entrance, card reader should operate ADA automatic door entrance (both interior and exterior). See Appendix VII for details.
