

### **329001 LANDSCAPE DESIGN CONSIDERATIONS**

1. Landscape plans shall be developed using the guidelines contained within the KU Heritage and Legacy Tree Master Plan.
2. Landscape construction documents shall include a Tree Preservation Plan.
3. Include the following list of notes in the design/construction documents:
  - a. Tree protection fencing must be in place prior to start of earth moving activities.
  - b. Construction activities in the CRZ (Critical Root Zone) must be approved by KU prior to start.
  - c. Tree planting sites shall have uncompacted soil to a depth of 12” for an area covering 40 square feet with the center being the tree’s trunk/bole. No further construction activities should take place within uncompacted area.
  - d. All tree related maintenance during construction shall adhere to the standards established and contained in ANSI A300 “Standards for Tree Care Operations”.
